THE Pluto 0001X sensor

X-ray imaging made seamless

High Image Quality

The 20 μm pixel pitch CMOS sensor combined with a CsI scintillator delivers sharp, detailed images with excellent contrast, crucial for accurate diagnosis.

Patient Comfort

Suitable for children and sensitive patients.

Ease of Use

Direct USB connection eliminates the need for a control box, simplifying setup and reducing hardware complexity.

Low Radiation Dose

Optimized detector technology allows high-resolution imaging at lower radiation doses, improving patient safety.

Durability

Designed for repeated clinical use with robust construction and reliable performance.

Based on advanced APS CMOS technology
